

## Skladon has opened the largest fulfillment center for e-shops in Moravia

*Mošnov, May 22, 2019* – **On Wednesday, May 22, Skladon officially opened its logistics center providing fulfillment services for e-shops. In the recently completed industrial hall near Ostrava Airport, more than 25,000 warehouse positions for online store owners were created on an area of 2,600 m<sup>2</sup>. Skladon took the opportunity of the global trend of logistics outsourcing in e-commerce.**

*„At the beginning, we wanted to fill a big hole in the e-commerce market and make life easier for e-shop owners, for whom logistics takes more than 40 % of the time in their business. Today, with the opening of our new logistics center, I see a growing interest in our services. I believe that this stage is the beginning of something really big. There are a large number of companies operating in this field abroad, so we know that we are heading the right direction,”* represents the future of Skladon its founder Konstantin Margaretis.

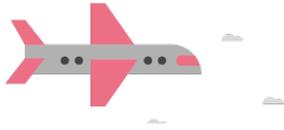

In the village of Mošnov near the Ostrava Airport, the first stage of the construction of a new industrial complex was completed this year. Skladon was one of the first private companies to move into this modern hall. *"We chose the industrial area in Mošnov primarily due to its location and the possibility of expanding capacities. The first phase, with an area of 2,600 sq m, will be followed by an expansion of 5,000 sq m in the second half of this year. We offer our clients storage of goods in one of the most modern halls in the Czech Republic. The strategic location will help ensure fast shipments to more than 160 countries around the world,"* adds Margaretis.

A new area is emerging in the Moravian-Silesian Region, which will help the expansion not only of manufacturing and engineering companies. This example shows that the future also lies in modern technologies and innovative solutions, which allows companies from this region to serve the whole world. The grand opening was also attended by Deputy Governor Jakub Unucka, who adds to Skladon's address: *"I am glad that such an ambitious company was established in the Moravian-Silesian Region. This shows the fact that the support of young entrepreneurs and startups with a clear vision and global goals has its place in our region. Personally, I'm glad to be here today."*

---

Skladon was founded by Konstantin Margaretis and Patrik Babinec in 2015 after winning the Brilliant Young Entrepreneurs startup competition. Later, the third of

the founders, Miloš Halecký, also joined them. The following year, they opened the first warehouse and began providing fulfillment services for the first clients. With the gradual expansion, they also started to develop their own application, which makes it easier for clients to overview and work with stocks, orders, returns or complaints. Thanks to the ever-growing demand, they approached a comprehensive solution for fulfillment services and created a modern facility in an industrial hall in the village of Mošnov near Ostrava Airport.
